3" Box & Sleeve Tutorial

## Supplies

Box Body - 8 ½" x 5"
Box Sleeve - 9 ½" x 3"
Box Sleeve Layers - 2 ¾" x 2 ¾" and 2 ½" x 2 ½"

Using the photo as a guide, score along the long edge at 1 ¾", 2 ¾", 5 ¾" and 6 ¾".
Along the short edge, score at 1" and 4"

Score along the lines and, once again using the photo as a guide, trim away the 4 outer rectangles and then make 1" incisions horizontally at the corners.

Round the edges of the 2 outer flaps.

Fold the tabs into the body of the box and secure using sticky strip or Tombow Mono Adhesive.

You will see from the picture that I lined my box by cutting one strip a shade under 1" and scoring at the corners, then cutting a square, a shade under 3" to fit in the bottom.

To make the outer sleeve, score the 9 ½" x 3" piece of cardstock along the long edge at $1 \frac{7}{8}$", 3", 6" and $7 \frac{1}{8}$".

Fold along the scores and wrap the sleeve around the body of the box to fit it. Secure the cross-over sections at the bottom with sticky strip.

Decorate the outside of your box and you desire!

This box is perfect for small chocolates, jewelry or a gift card!
